Ego quidem CLERICEI GENERIS ætate, speciemque plurium Historiarum, ac documentorum testimonio (1) festulus TUI designare paraveram, sed tantum mihi ex eo Perilluſum Virosum numerus occurrit, ut breve hujus Epistolæ compendium excedat: totique singuli coronandi laudibus fecerit, ut Patetiam Tuorum modestiæ displicere facile possem. Abstract

Monte Carlo, 1999, de l'Institut de l'Environnement de l'Université de Bordeaux et l'INRA.

Abstract: The purpose of this study was to determine the effect of a 12-week training program on the physical and psychological characteristics of young women. The study was conducted in a laboratory setting. The subjects were 15 young women, aged 18-25, who were divided into two groups: a control group and an experimental group. The experimental group underwent a 12-week training program consisting of aerobic and strength training. The physical characteristics measured were maximum oxygen consumption ($\dot{V}O_{2max}$), maximum heart rate (HR_{max}), and maximum power output (P_{max}). The psychological characteristics measured were anxiety, depression, and self-esteem. The results showed that the experimental group had significantly higher values for $\dot{V}O_{2max}$, HR_{max} , and P_{max} compared to the control group. Additionally, the experimental group had significantly lower levels of anxiety and depression, and higher levels of self-esteem compared to the control group. The findings suggest that a 12-week training program can improve the physical and psychological characteristics of young women.
